PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in CI/CD automation, AWS cloud infrastructure, Linux administration, Docker, Kubernetes, infrastructure as code, and monitoring. Experienced with GitHub Actions, Jenkins, Terraform, Ansible, Helm, Argo CD, Prometheus, Grafana, and Vercel. Worked on automated build and deployment workflows, containerized applications, troubleshooting of CI/CD, deployment, Linux, and infrastructure issues, infrastructure provisioning, security checks, and system monitoring. Familiar with Bash, Python, Git, DNS, HTTP/HTTPS, networking fundamentals, and cloud deployment workflows.

TECHNICAL SKILLS

Cloud: AWS, EC2, VPC, IAM, S3, ALB, Auto Scaling, Route 53, CloudWatch, EKS, Vercel

CI/CD: GitHub Actions, Jenkins

Containers: Docker, Docker Compose

Kubernetes: Kubernetes, EKS, kubectl, Minikube, Helm

GitOps: Argo CD

Infrastructure as Code: Terraform

Configuration Management: Ansible

DevSecOps: Trivy, SonarQube, OWASP Dependency-Check

Monitoring: Prometheus, Grafana, Node Exporter

Linux & System Administration: Linux, Amazon Linux, SSH, system troubleshooting, user and permission management, process management, services, package management, cron

Networking: DNS, TCP/IP, HTTP/HTTPS, TLS/SSL, ports, security groups, reverse proxy, Cloudflare

Web Servers: Nginx, Apache

Scripting: Bash, Python

Version Control: Git, GitHub

Troubleshooting: CI/CD pipeline issues, deployment issues, Linux build environments, application and infrastructure issues

Project Management: Jira, Scrum, Kanban

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern

May 2026 – Aug 2026

Intersect Info Developers

- Developed and maintained GitHub Actions CI/CD workflows for linting, testing, Docker image builds, security checks, and application deployments.
- Worked with Docker and Kubernetes to build, deploy, and manage containerized application services.
- Configured Prometheus and Grafana to monitor application, container, and server metrics.
- Troubleshot CI/CD and deployment issues involving GitHub Actions workflows, npm dependencies and lockfiles, Linux build environments, and application deployments.
- Worked with Git and GitHub-based development and deployment workflows.
- Assisted with troubleshooting application and infrastructure issues and documented deployment and configuration steps.

PROJECTS

CI/CD and GitOps Project

[GitHub Repository](#)

Tech Stack: GitHub Actions, Docker, Kubernetes, Helm, Argo CD, SonarQube, Trivy

- Built a CI/CD pipeline using GitHub Actions for linting, testing, security checks, Docker image builds, and image publishing.
- Integrated SonarQube and OWASP Dependency-Check for code quality and dependency security checks.
- Used Trivy to scan Docker images for vulnerabilities before publishing images to Docker Hub.
- Deployed applications to Kubernetes using Helm and Argo CD.
- Used Git-based workflows to manage application and deployment configuration.

Monthly Patch Automation

[GitHub Repository](#)

Tech Stack: Ansible, Linux

- Automated monthly Linux server patching using Ansible playbooks.
- Used Ansible to apply security updates and maintain consistent server configurations.
- Practiced routine Linux maintenance and configuration management using Ansible.

EC2 Infrastructure Provisioning

[GitHub Repository](#)

Tech Stack: Terraform, AWS

- Provisioned AWS EC2 instances using Terraform.
- Configured security groups and instance settings through Terraform.
- Managed infrastructure configuration using version-controlled Terraform code.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

Expected 2026

Ambikeshwari Campus, Ghorahi, Dang, Nepal
