PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in Linux, AWS, Docker, Kubernetes, and Terraform. Skilled in designing and automating scalable cloud infrastructure, building CI/CD pipelines with Jenkins, and implementing Infrastructure as Code (IaC) for reliable, repeatable software delivery.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, AMI, ASG, ELB, VPC, S3, NAT Gateway, Route Tables, IAM)

Containers & Orchestration: Docker, Kubernetes (Pods, Deployments, StatefulSets, DaemonSets, ReplicaSets, Services, Ingress)

IaC & Automation: Terraform, Bash Scripting

CI/CD & Version Control: Jenkins, Git, GitHub

Operating Systems: Linux (Ubuntu, CentOS, RHEL)

PROFESSIONAL EXPERIENCE

Code for Change | Member *Feb 2025 – Feb 2026*

- Active member of a community-driven tech initiative promoting social impact through open-source development and collaborative engineering.

PROJECTS

AWS Infrastructure Automation with Terraform

- Automated provisioning of VPCs, subnets, EC2 instances, ASGs, load balancers, S3 buckets, and security groups; managed AMIs and Launch Templates for consistent, repeatable deployments.

Jenkins CI/CD Pipeline

- Built end-to-end Jenkins pipelines integrated with GitHub to automate build, test, and deploy workflows, reducing manual effort and improving release cadence.

Kubernetes Cluster Management

- Deployed containerized apps on Kubernetes using Deployments, StatefulSets, Services, and Ingress; built Docker images and configured namespaces and ReplicaSets for isolated workloads.

EDUCATION

B.Sc. Computer Science & Information Technology *Jan 2022 – Present*

Ambikeshwari Campus — Ghorahi, Dang

+2, Science *Jan 2019 – Dec 2021*

Gorkha International Public Secondary School — Ghorahi, Dang

SEE — Computer Science *Apr 2017 – Mar 2019*

Shuvatara English Boarding School — Gadhawa, Dang

CERTIFICATIONS

- 100 Days of DevOps — KodeKloud (In Progress)
