## PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in CI/CD automation, containerization, cloud infrastructure, Kubernetes deployments, and Linux-based application environments. Experienced with GitHub Actions, Jenkins, Docker, Kubernetes, Helm, Argo CD, Terraform, Ansible, AWS, Azure, Nginx, and Prometheus/Grafana monitoring.

## PROFESSIONAL EXPERIENCE

### DevOps Engineer Intern | Intersect Info Developers

Mar 16 2026 – 2026 Sept 26

- Developed and maintained GitHub Actions CI/CD pipelines for testing, Docker image builds, and application deployments.
- Containerized application services using Docker and Docker Compose with multi-stage builds.
- Configured Nginx as a reverse proxy and managed application deployments on Ubuntu-based VPS environments.
- Set up Prometheus and Grafana monitoring for application, container, and server metrics.
- Troubleshoot CI/CD and deployment issues involving GitHub Actions workflows, pnpm dependencies and lockfiles, Linux builds, and production deployments.

## PROJECTS

### CI/CD & GitOps Project

Next.js | GitHub Actions | Docker | Kubernetes | Helm | Argo CD | [GitHub Repository](#)

- Built a CI/CD pipeline with GitHub Actions for linting, testing, security checks, Docker image builds, and image publishing.
- Integrated SonarQube and OWASP Dependency-Check for code-quality and dependency security analysis.
- Built and scanned Docker images with Trivy before publishing immutable Git SHA-tagged images to Docker Hub.
- Implemented GitOps-based Kubernetes deployments with Helm and Argo CD, separating CI from deployment and enabling Git-based cluster reconciliation.
